Quality Control

We have an agronomist who ensures that proper practices at our farmer's farms are followed for example

- Proper farming records are kept
- Traceability of produce from farmers to pack house
- Proper post harvesting methods are followed
- Proper coding when planting commences
- Inspection records for pests and diseases

Quality controller

Our quality controller at the pack house ensures the following

- Health safety regulations are followed
- Proper dress attire in pack house
- Ensure that banned substances are not used and checked for in produce
- Proper sorting and quality produce is sent for export
- Retention sampling
- Identifying pests like false coding moth

Pricing

We offer affordable prices according to world market prices

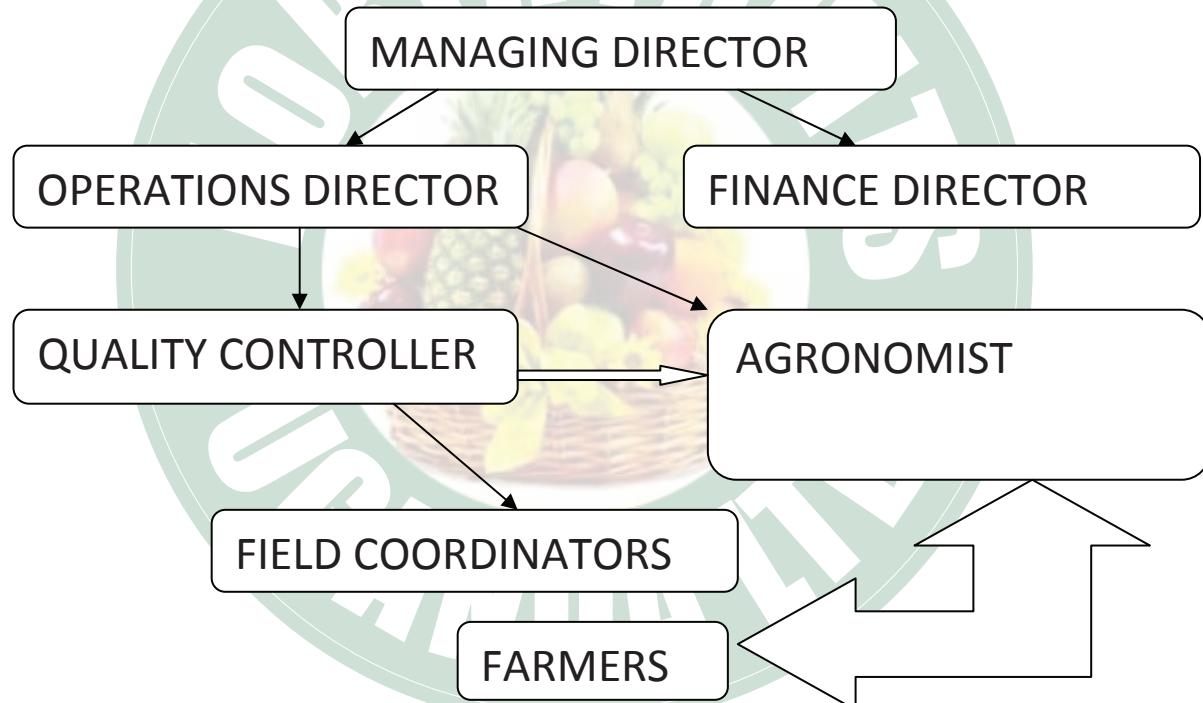

Why choose us??

We are efficient, effective in delivery and know our market well.

We have the right farmers who follow best farming practices
and we know our products well.
